SUMMER INTERNSHIP PRESENTATION

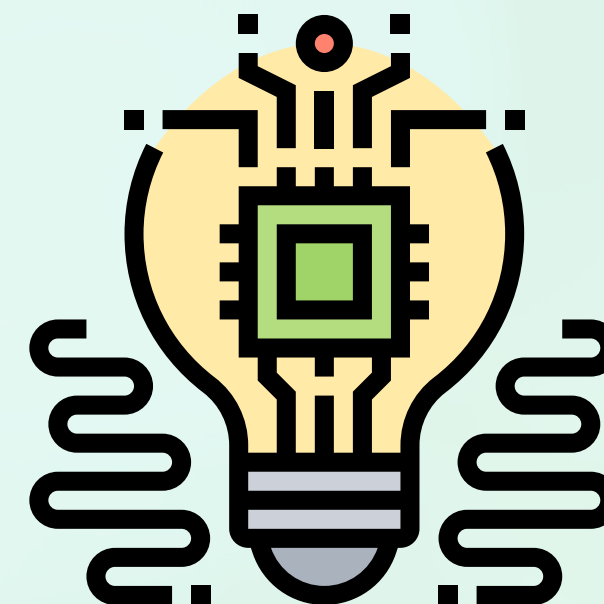

IILM UNIVERSITY GREATER NOIDA

AI-Powered B2B Sales Automation

Bonhoeffer Machines Pvt. Ltd. (Gurugram)

B.Tech CSE(AI/ML) | 2026-27 | 4CSE1 | CS-2341727

Aditya Sahani · AI & ML Intern

Internship Snapshot

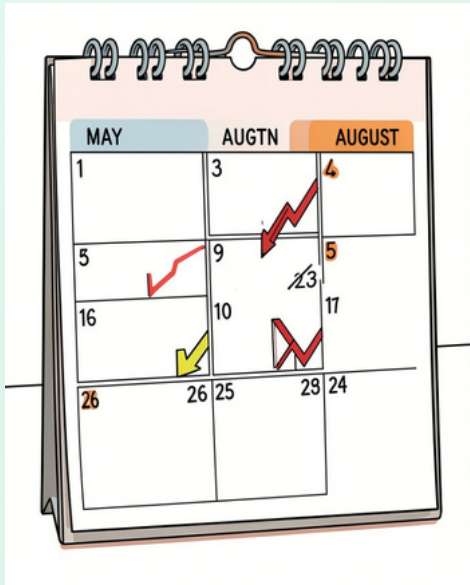

Organization

Bonhoeffer Machines Pvt. Ltd.,
Gurugram — industrial &
agricultural power equipment

Role

AI & ML Intern — Sales AI
department (product design,
engineering, deployment)

Duration

21 May 2026 — 21 Aug 2026
(3 months)

Focus

End-to-end AI sales
automation: intelligence,
outreach, multilingual
conversational agent

❏ Hands-on work: design, build, and deploy a production-ready international sales platform.

Organization Profile

Bonhoeffer Machines (est. 1978) produces power equipment for farming, gardens, forestry and industry. Two operating divisions — Garden & Forestry and Hardware — manufacture products in ISO-certified facilities across Asia.

International Reach

Serves 23+ countries via 5,743+ distributors and 5.7M+ customers worldwide.

Strategic Goal

Modernize B2B sales with AI to scale international outreach and improve conversion visibility.

The Problem — Before the Project

Manual Lead Research

Hours spent finding right contacts per company across geographies.

Manual Outreach

Each WhatsApp or email was composed and sent individually — no scale.

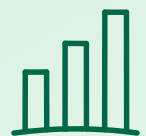

Scheduling Overhead

Time-zone coordination and meeting setup required heavy manual effort.

Language Barriers

Prospects spoke Spanish, Portuguese, English and Bengali — limiting reach.

No Visibility

No unified dashboard to track conversations, campaigns, and engagement.

No Follow-Up System

Non-responsive leads were frequently forgotten — no automated sequence.

Project Objectives

1

Automate Prospect Discovery

Enrich international leads with company and contact data automatically.

2

Scale Multi-Channel Outreach

Enable WhatsApp + Email campaigns with template and language controls.

3

Multilingual Conversational Agent

Build an AI to qualify leads, book meetings, and converse in EN/ES/PT/Bengali.

4

Automated Follow-Ups

Structured, multi-stage sequences with exit-phrases detection and deduplication.

5

Unified CRM Visibility

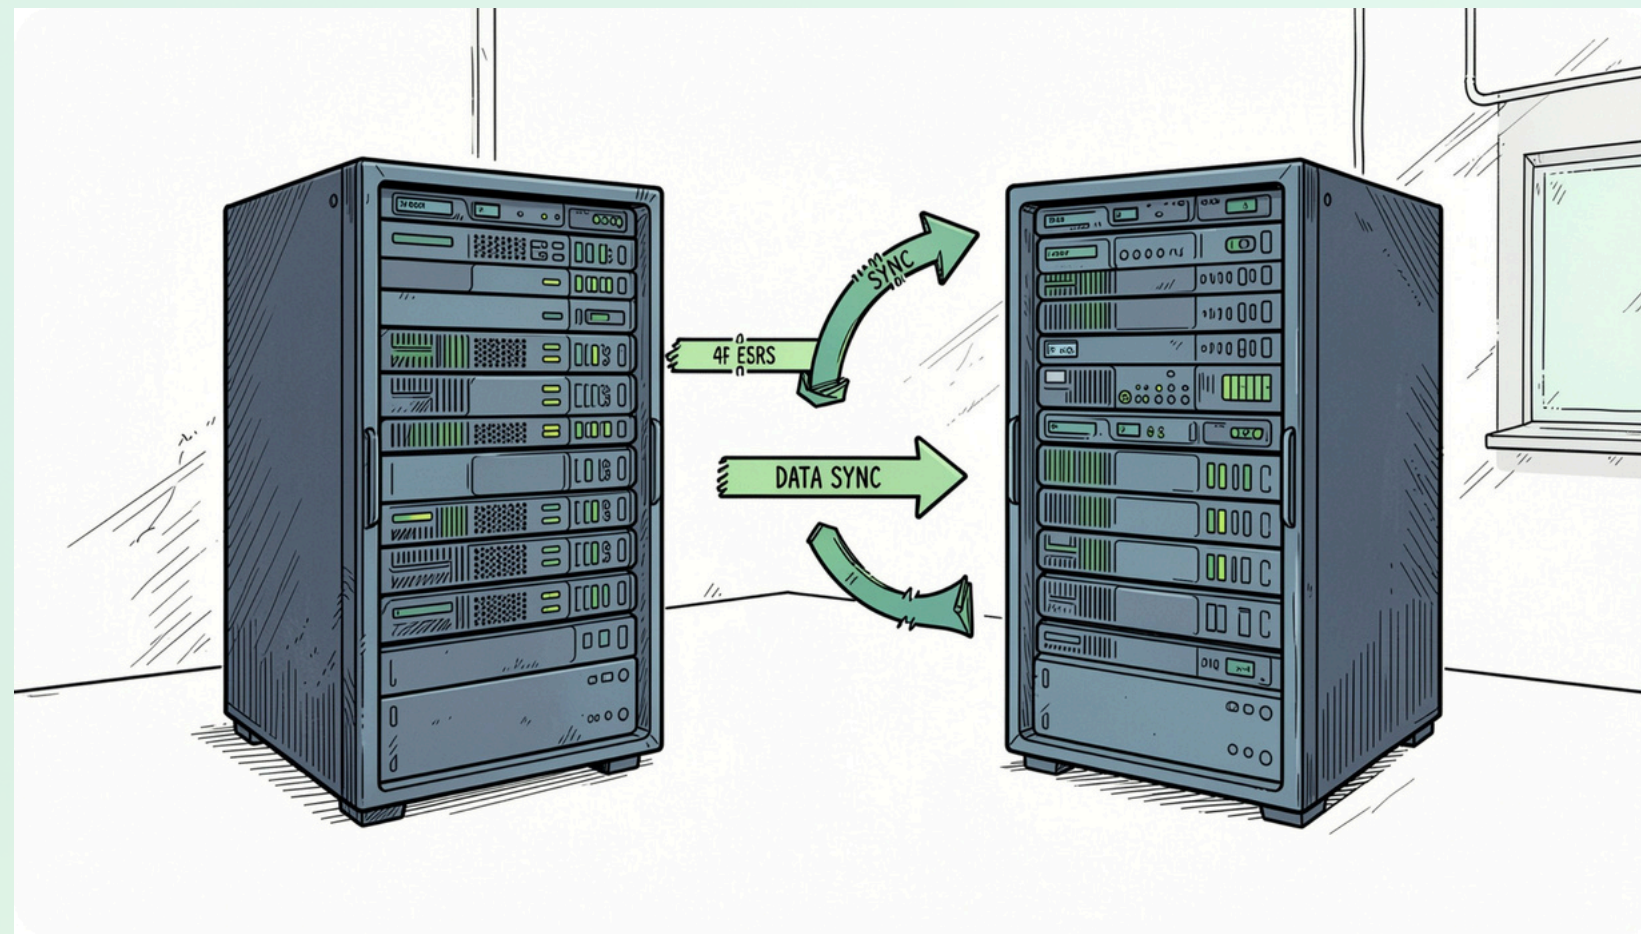

Central dashboard for conversations, delivery badges, campaigns and status.

6

Production Readiness

Lean infrastructure and resource-optimised cron jobs for reliable operation.

Solution Overview — Two-Server Architecture

Server 1 — Company Intelligence Platform

Features: Apollo.io enrichment, Hunter.io email verification, Serper.dev research, deduplicated store for contact data.

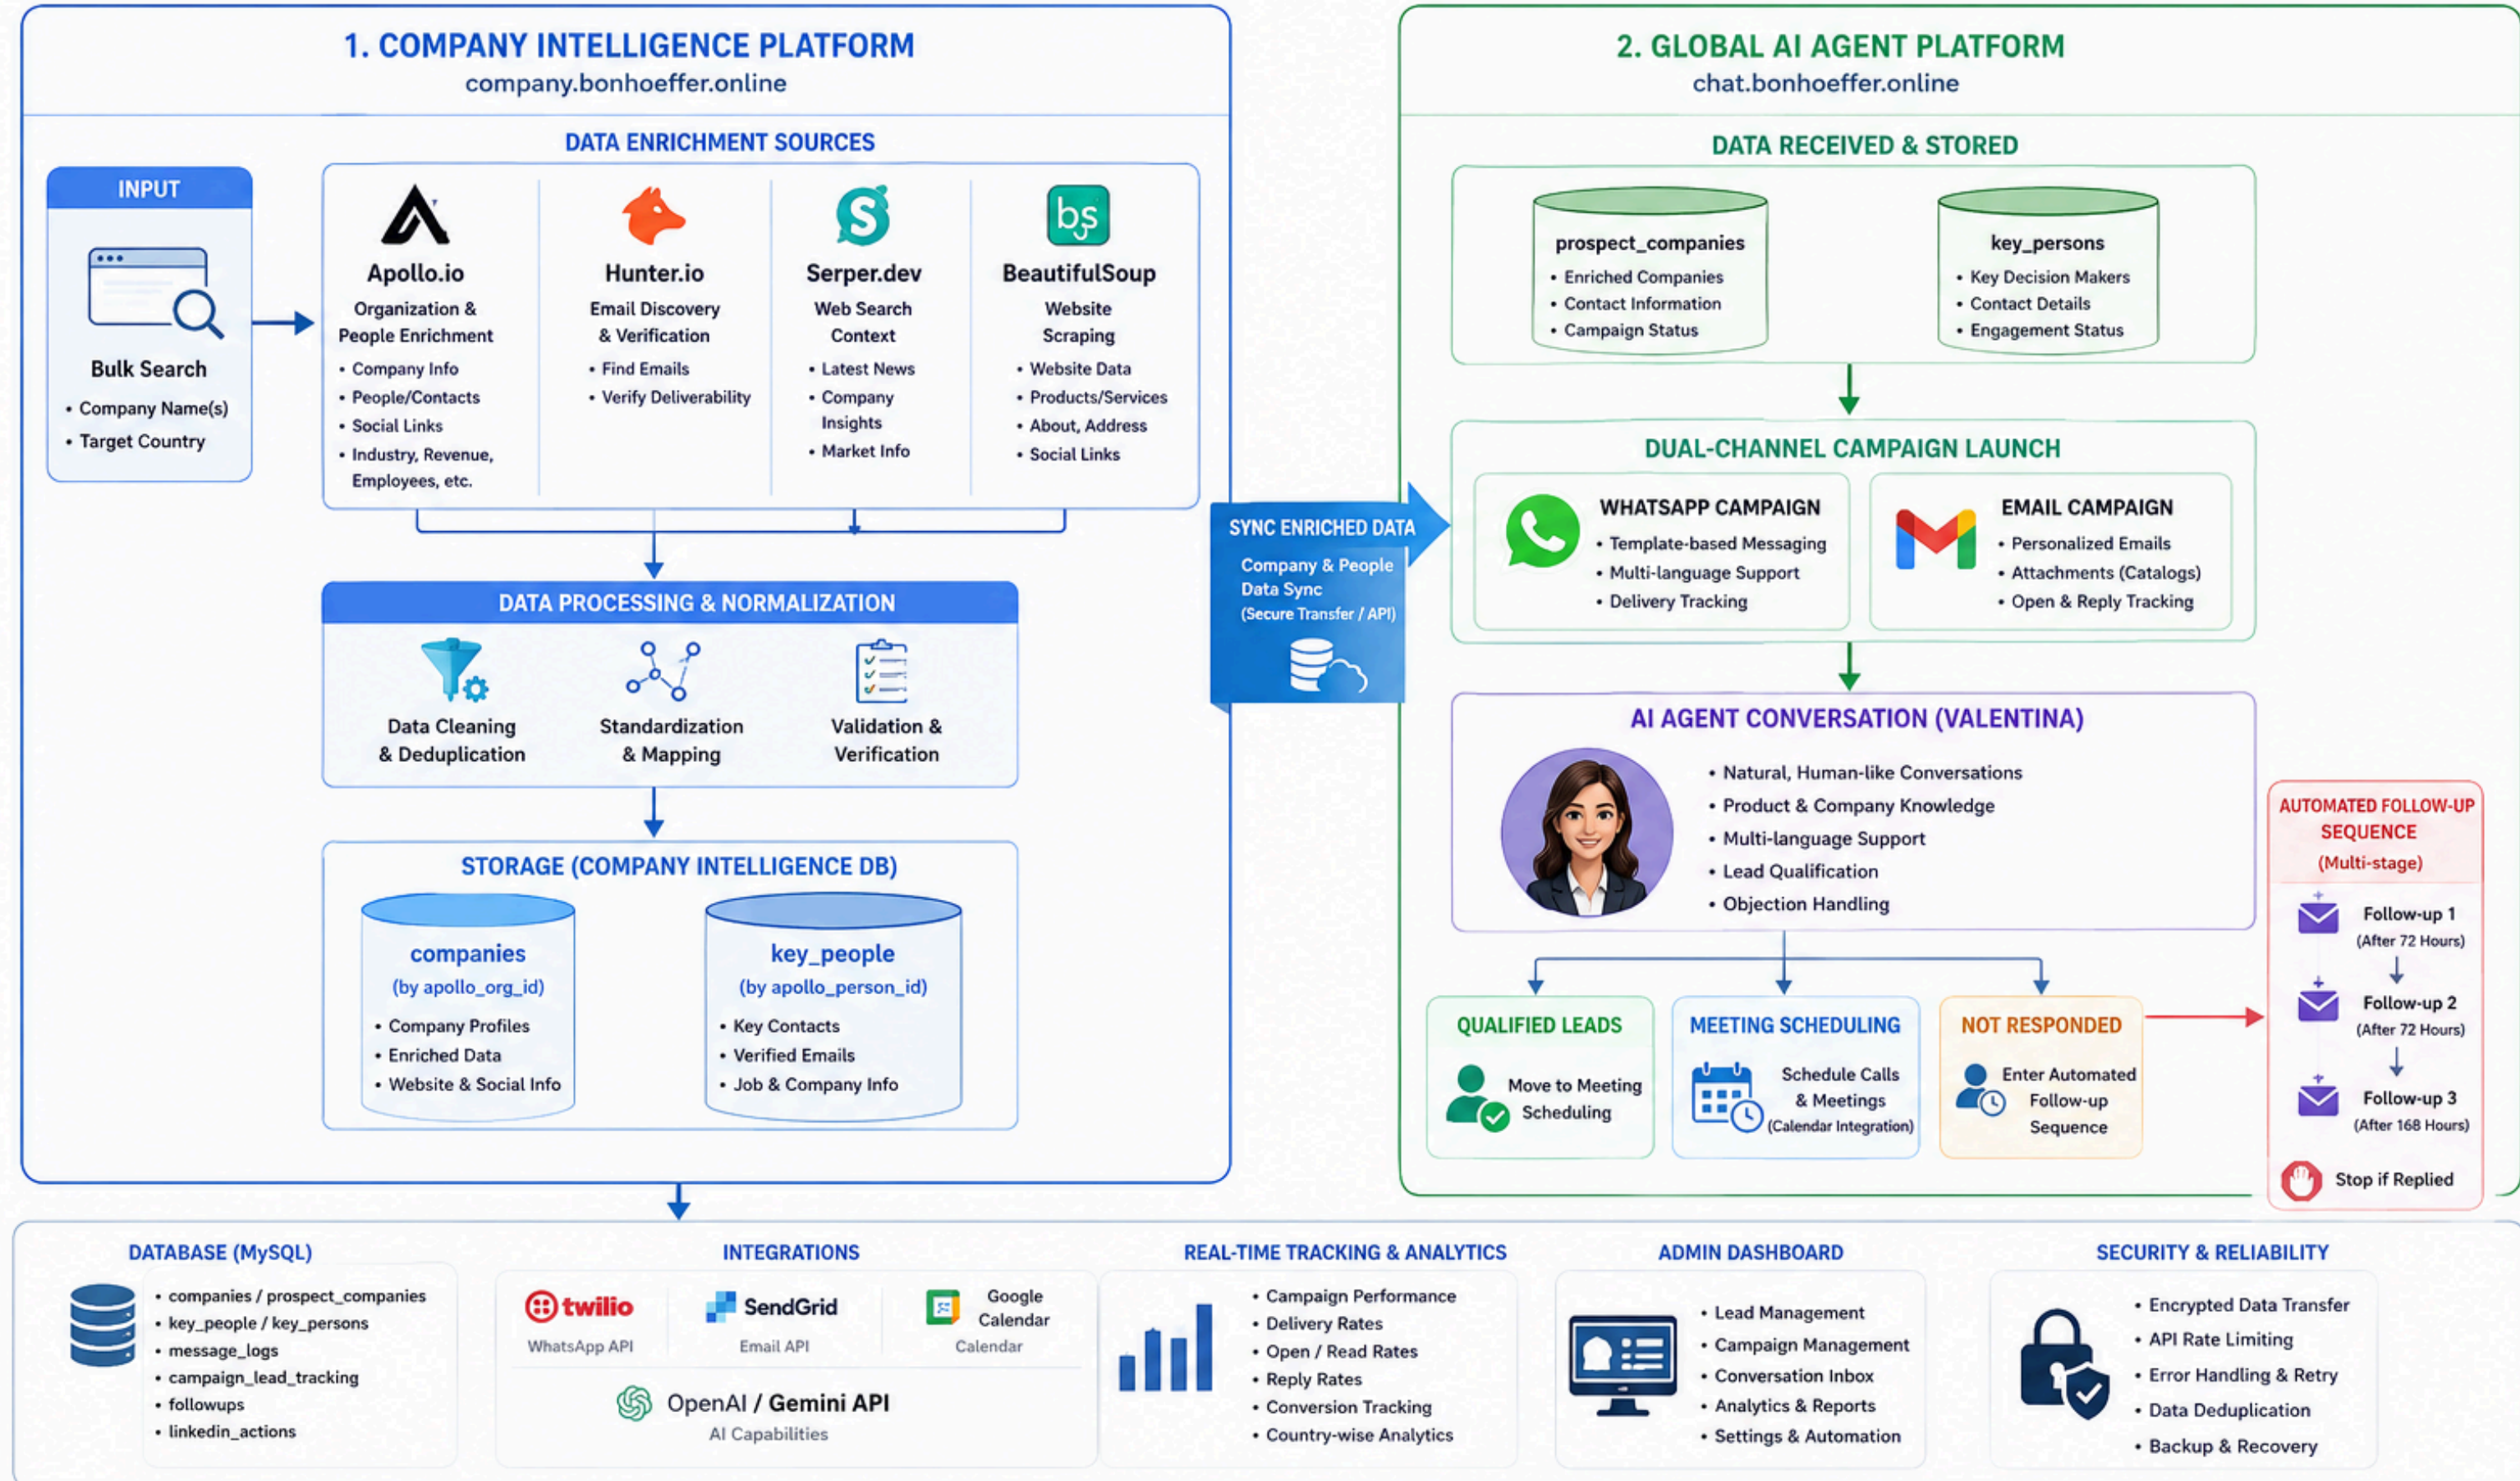

Server 2 — Global AI Agent Platform

Features: Dual-channel WhatsApp + Email campaigns, Valentina AI agent (conversational qualification), automated multi-stage follow-ups and unified CRM dashboard.

- ❏ Data flows via enrichment-sync webhooks — asynchronous processing enables parallel lead handling at scale.

Bonhoeffer Global Outreach Platform – End-to-End Workflow

From Company Research & Enrichment to AI-Powered Conversations and Conversions

GOAL: Discover the right leads. Reach them the right way. Nurture relationships. Drive conversions.

Bonhoeffer Machines – Powering Growth Worldwide

Technology Stack

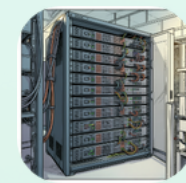

Backend

Python 3.12, Flask,
Gunicorn, VPS

AI Orchestration

CrewAI multi-agent
orchestration,
OpenAI GPT-4o /
GPT-4o-mini

Data & Memory

OpenAI embeddings,
FAISS, MySQL 8.0,
SQLAlchemy

Messaging

Twilio WhatsApp
API, Gmail
SMTP/OAuth

Frontend

React, TypeScript,
Vite, Tailwind

Infra

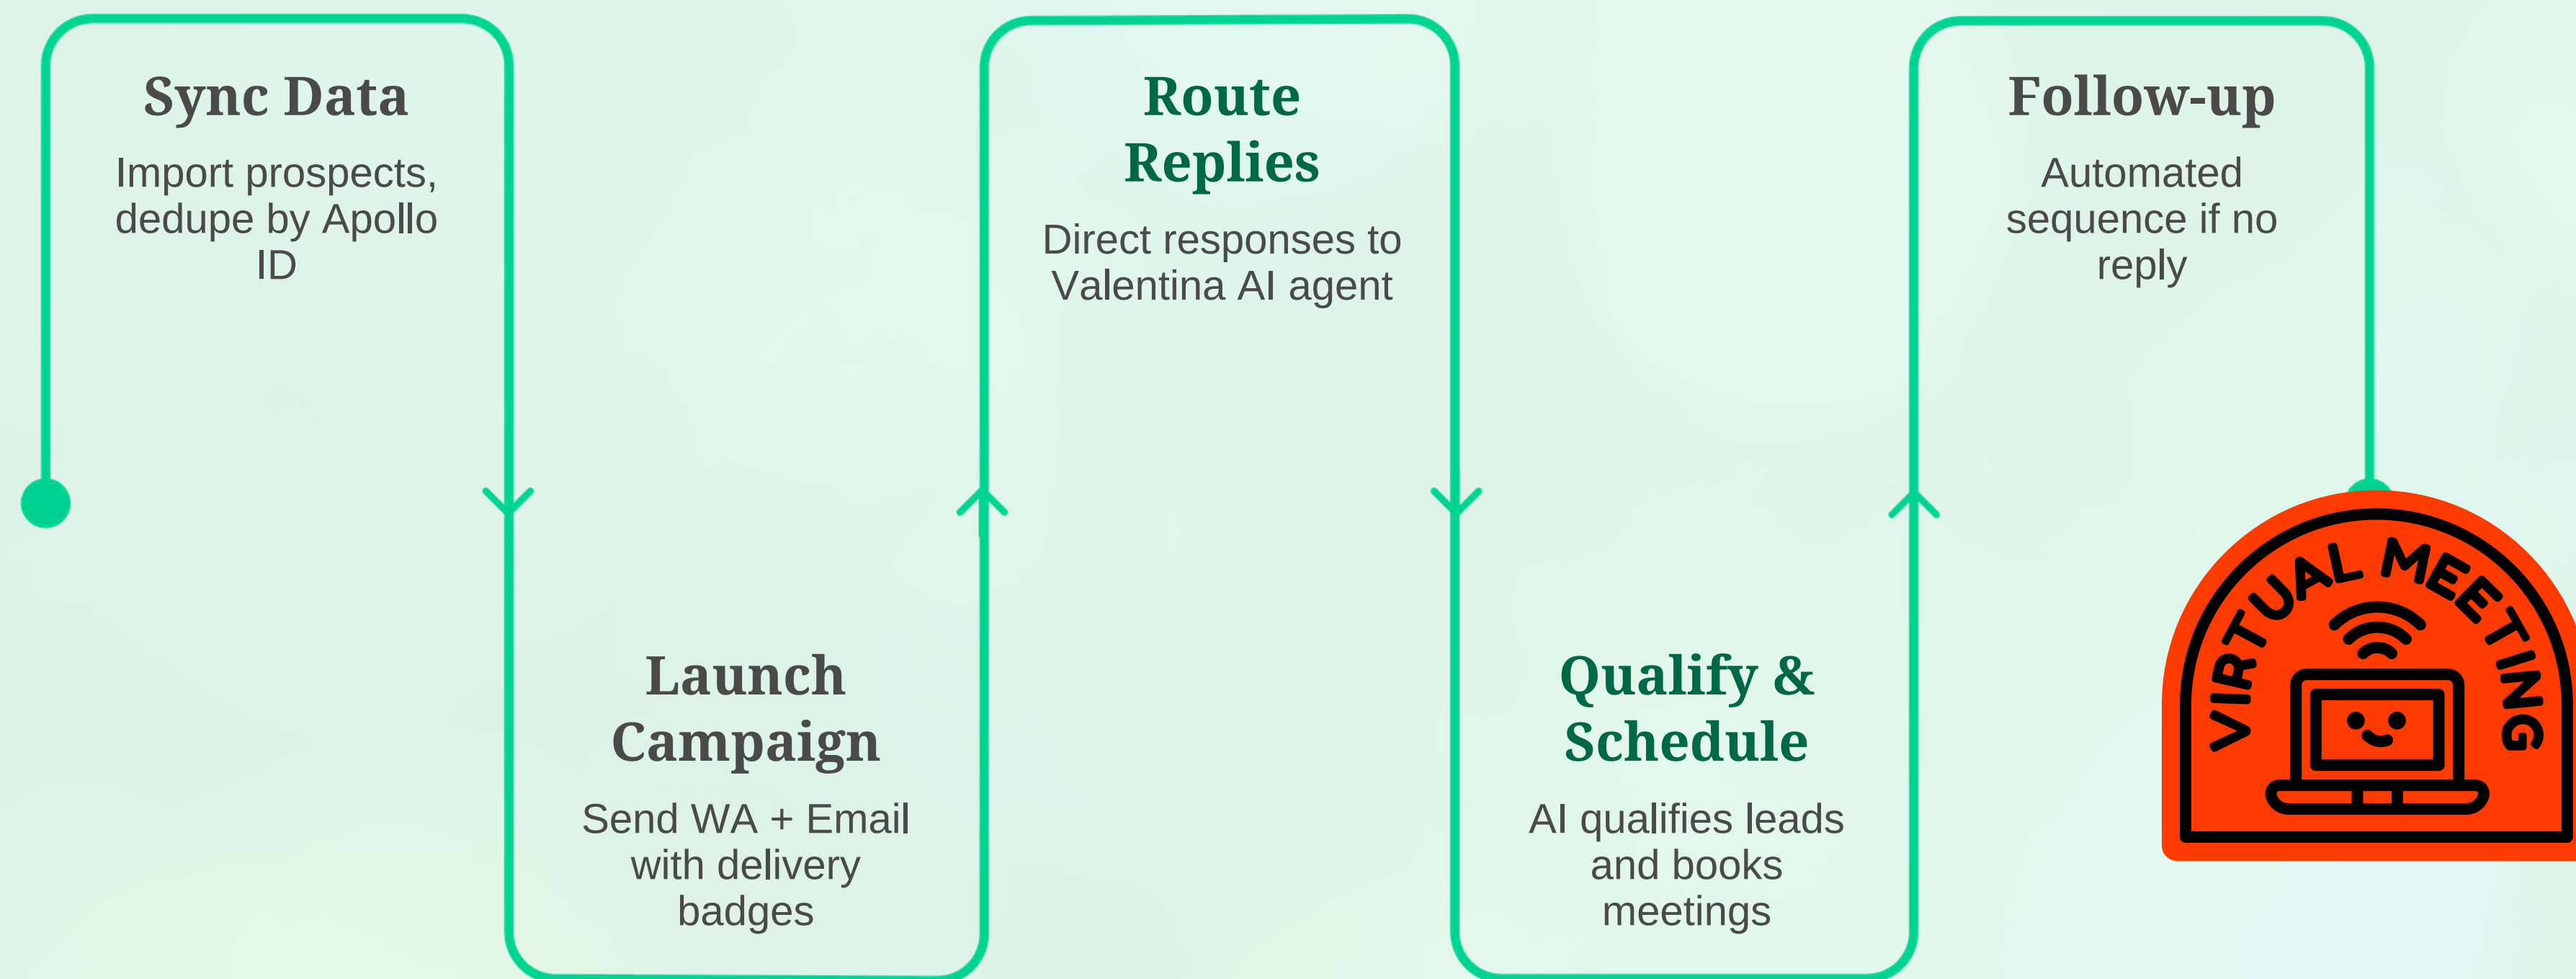

Ubuntu 24, Nginx,
systemd - lightweight,
production-focused, VPS
,ClaudPanel

Company Intelligence Platform — Flow

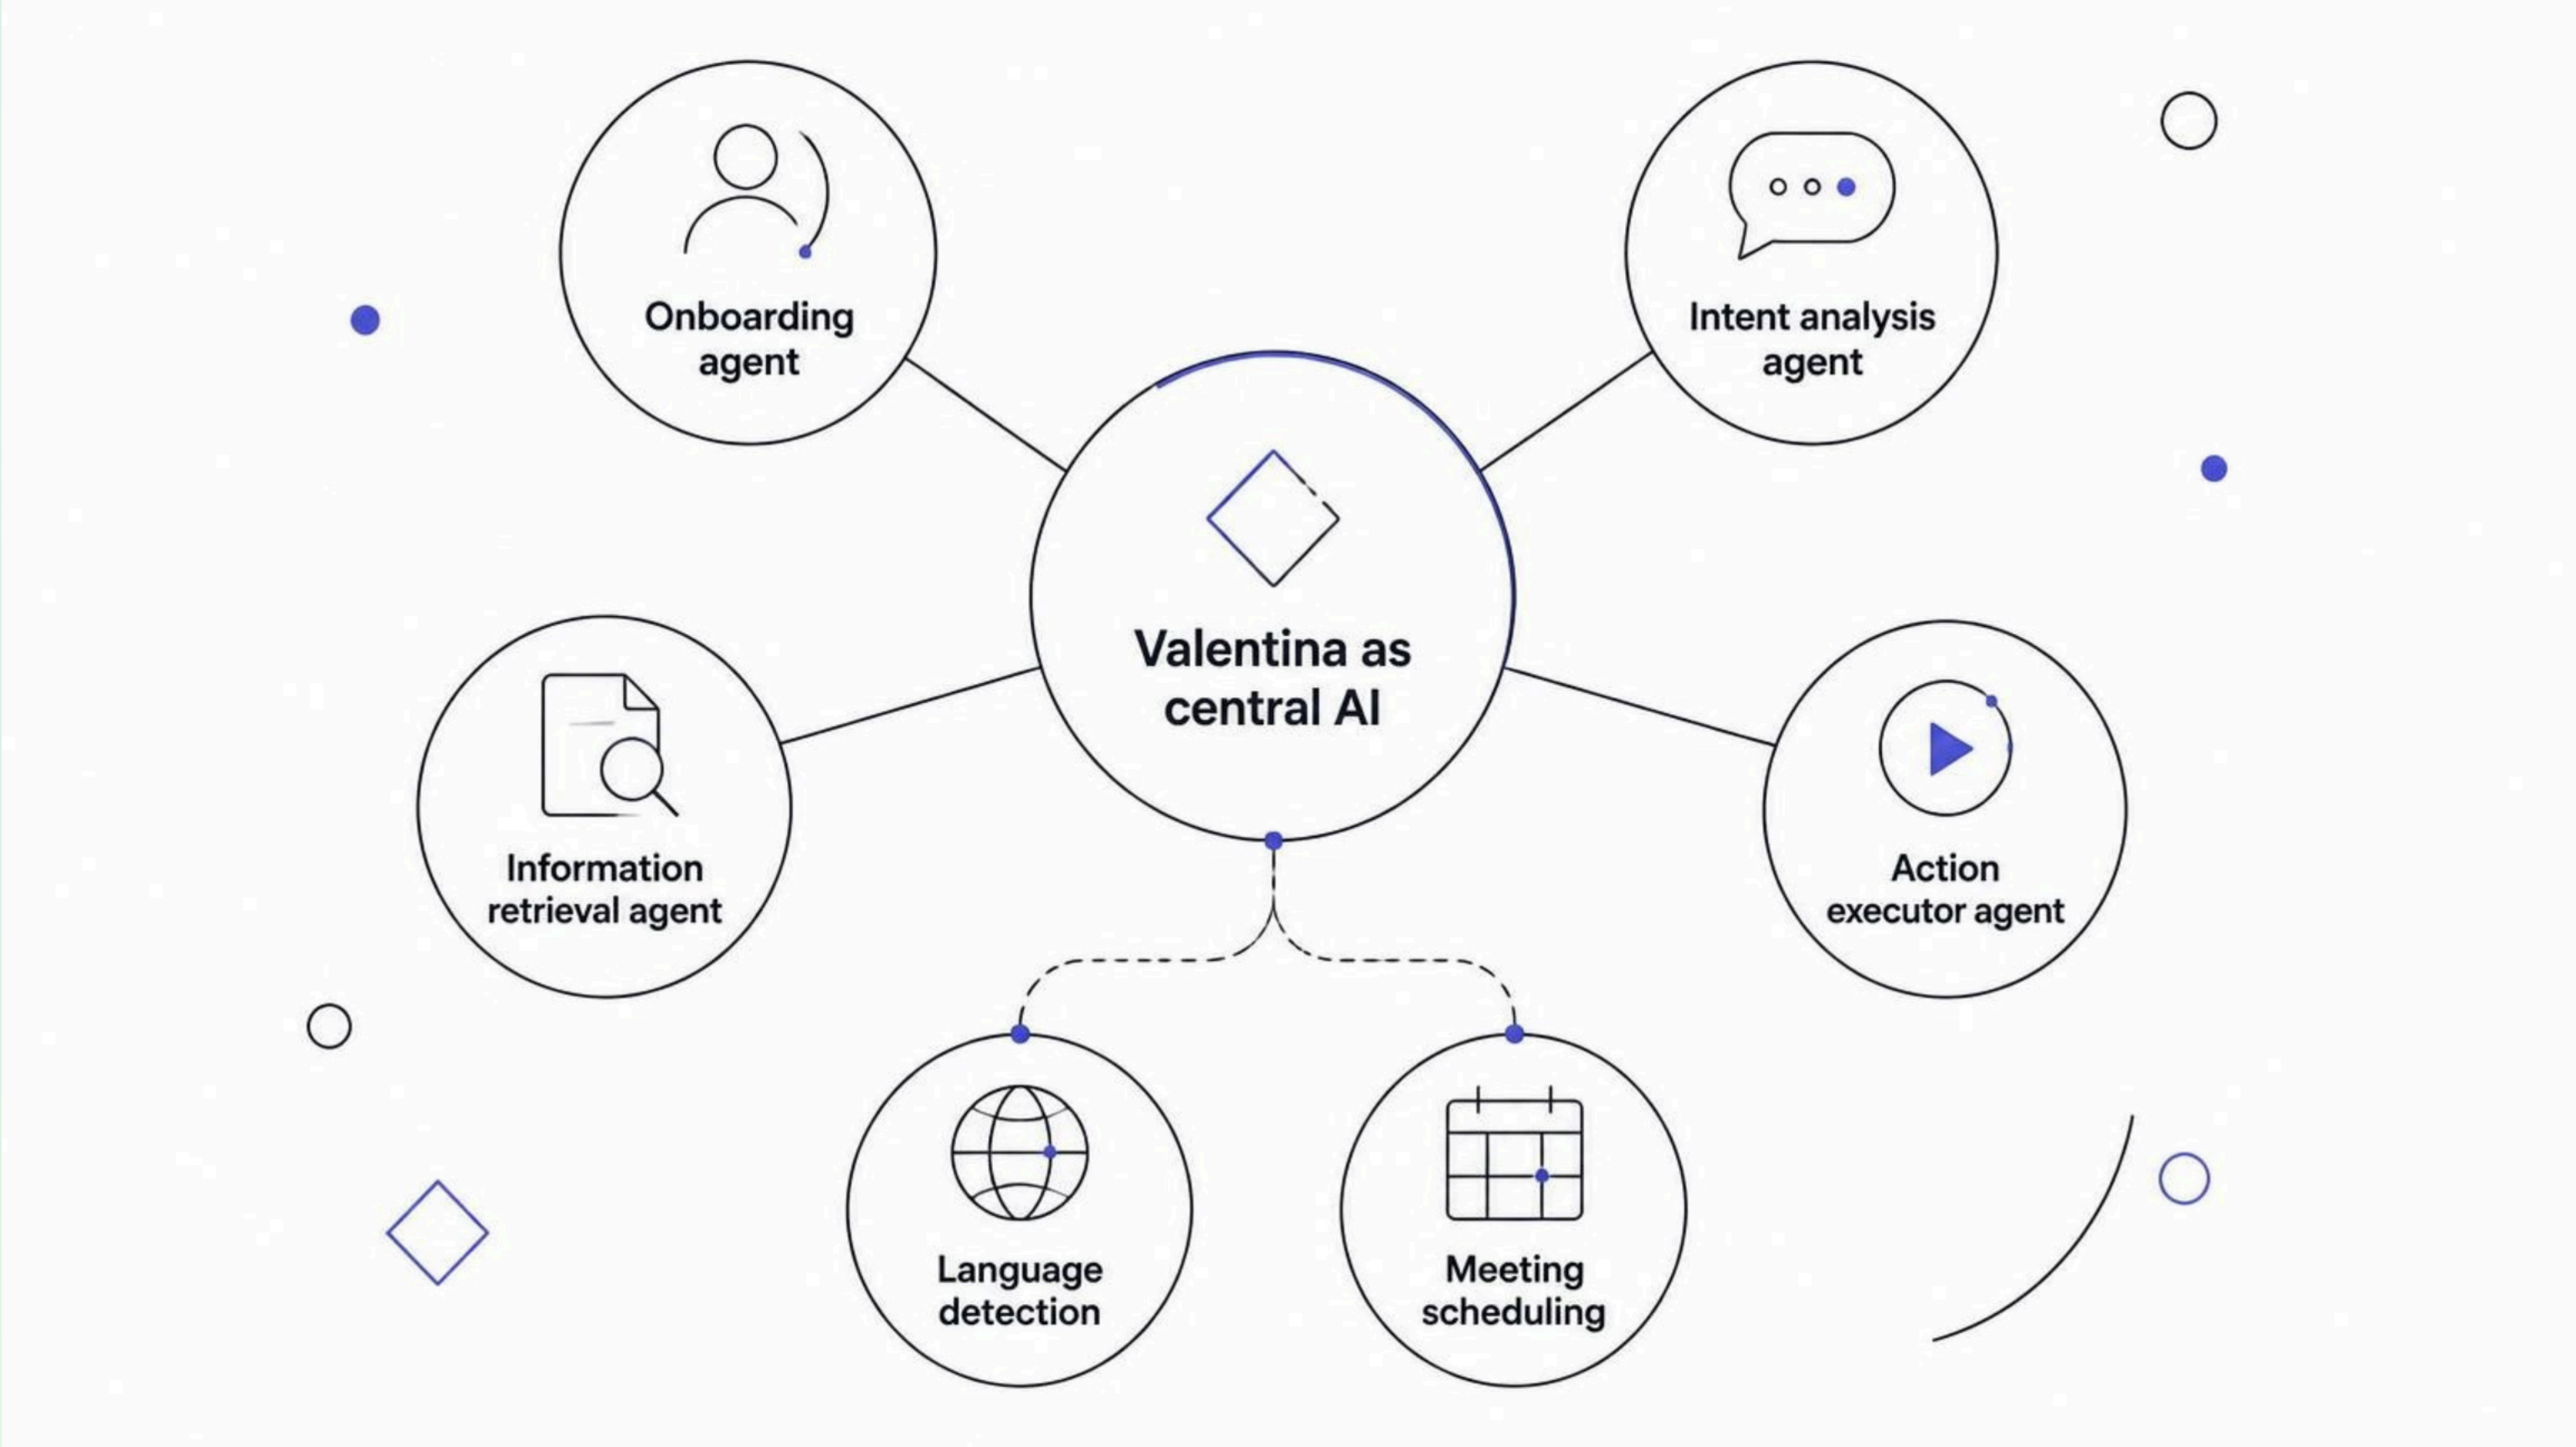

Key innovation: webhook-driven phone verification from Apollo — enables asynchronous, parallel enrichment and large-batch processing without blocking workers.

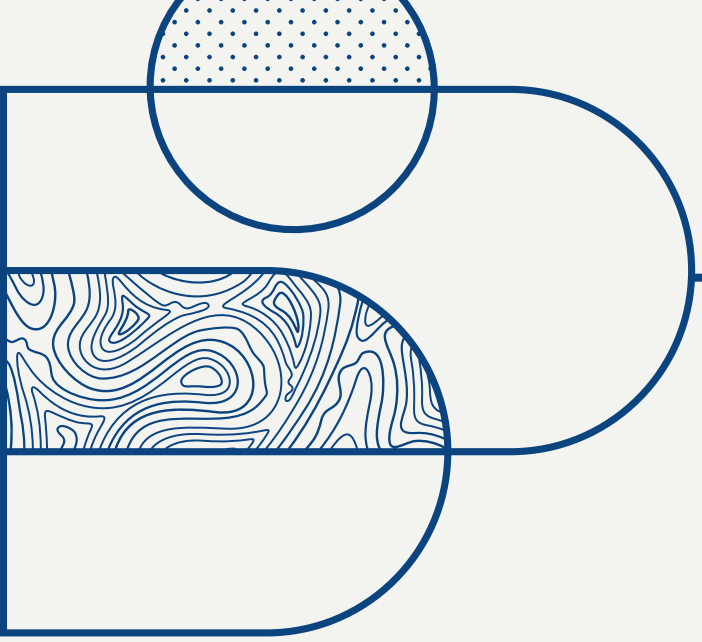

Global AI Agent Platform — Flow

The platform handles delivery-status badges (WA/Email combinations), deduplicates by Apollo IDs, and skips previously mess_sent leads to avoid duplicate outreach.

Valentina — Multi-Agent Pipeline & Impact

THANK YOU
